

## **EVENT DETAILS**

HEmostatic RESuscitation and Trauma Induced Coagulopathy (HERETIC) Symposium

## **VENUE**

Wyndham Pittsburgh University Center  
100 Lytton Ave.  
Pittsburgh, PA 15213

**DATE:** OCTOBER 11-12, 2022

## **PRESENTED BY:**

- The Trauma and Transfusion Medicine Research Center
- The University of Pittsburgh's Center for Military Medicine Research
- McGowan Institute for Regenerative Medicine
- Trauma Hemostasis and Oxygenation Research (THOR) Network

## **OVERVIEW**

The University of Pittsburgh's Center for Military Medicine Research and the Trauma and Transfusion Medicine Research Center, along with McGowan Institute for Regenerative Medicine and in collaboration with the THOR Network, present the inaugural HEmostatic RESuscitation and Trauma Induced Coagulopathy (HERETIC) Symposium.

## **INTENT AND OBJECTIVES**

Our intent is to bring together a rich mix of researchers, providers, the Department of Defense, and private and public research program managers in order to present the current state of the science, stimulate discussion, and build connections that are only possible through this forum.

This symposium is designed to disseminate and discuss the most up-to-date research and best practices in the field of hemostatic resuscitation and trauma induced coagulopathy and celebrate the growing partnerships and research opportunities available through private and public research programs.

## **WHO SHOULD ATTEND**

This course is intended for researchers, providers, the Department of Defense, and private and public research program managers.

## **REGISTRATION AND AGENDA**

- To register and directed to the conference website, please click [this link](#).
- A draft agenda is available for viewing at [this link](#), and will be updated regularly.

**INFORMATION:** To learn more about this conference, please contact Zachariah Hoydich at [hoydichzp@upmc.edu](mailto:hoydichzp@upmc.edu).

## **CONFERENCE HIGHLIGHTS**

Jason L. Sperry, MD, MPH

"Epidemiology, Outcomes, and Gaps in Knowledge for Traumatic Bleeding in Adults"

Matthew D. Neal, MD, FACS

"Biology and Treatment of TIC – Late-phase Response"

COL Andrew P. Cap, MD, PhD, FACP

"Transformational Change in Combat Casualty Care Research"

"Cold Platelets for Life-Threatening Bleeding"

Mitchell Cohen, MD

"The Biology of Threat X: Coagulation, inflammation, Immune and Endothelial Perturbations after Critical Injury and illness. Implications for Generalized Countermeasures and Personalized Medicine."

Ernest E. "Gene" Moore, MD

"The Role of Post-injury Hypocalcemia"

### **CALL FOR POSTER ABSTRACTS**

We will accept poster abstracts, now through Sept. 11, 2022, on research, evidence-based practice, and quality initiatives as they relate to hemostatic resuscitation and trauma induced coagulopathy care. If selected, you will have the opportunity to display and discuss your poster in the designated viewing areas during the conference. To submit an abstract for poster consideration, please click [this link](#).

- We will not be publishing abstracts.
- There will not be awards.
